CAREER OBJECTIVE

Final-year Computer Science student with basic knowledge of web development and programming. Completed several academic projects using HTML, CSS, JavaScript, PHP, Python, and C#. Eager to learn and grow by applying my skills in real-world software development environments.

KEY SKILLS & COMPETENCIES

- **Frontend Development:** Familiar with HTML, CSS, JavaScript, and Bootstrap for building responsive and user-friendly web interfaces.
- **Backend Development:** Basic understanding of PHP, Python, and C# for handling server-side logic and simple web functionalities.
- **Project Experience:** Completed several academic projects using full stack technologies in both group and solo settings.
- **Problem Solving:** Able to debug basic coding issues and improve functionality through logical thinking and code testing.

PROJECTS

Word Polygons – Puzzle Game using Tkinter
Group Project | Python | April 2025
- Developed a word game in Python with hexagonal UI using Tkinter.
- Integrated features like score tracking, hint system, and dictionary validation.

Elev8 – A Job Marketplace
Group Project | Web Technologies | December 2024
- Developed a dynamic job marketplace platform connecting employers and job seekers.
- Features include user registration/login, job posting, application tracking, and admin controls.
- Focused on clean UI/UX and secure user authentication with form validation.
- Enabled role-based access (Job Seeker, Employer, Admin) with structured database relationships.

SpeakVerse – Language Learning Platform
Group Project | C# (Windows Forms) | January 2024
- Developed a language learning platform with user-based access and course management features.
- Implemented CRUD operations for managing language courses, including add, update, delete, and view.
- Designed intuitive forms for users to view available courses and for admins to manage content.
- Focused on role-based access control, separating user and admin functionalities.
